- Team Player

About Me

A resilient positive thinker with the ability to remain focused when navigating complex and challenging tasks. Firmly believes that mistakes are valuable learning experiences that contribute to personal growth and strength.

2025 - present

E-Mail Campaign Developer **Voordeeltjes, Amstelveen**

As an E-Mail Campaign Developer, where I design, code, and deploy responsive email campaigns that effectively engage and convert audiences. I collaborate closely with marketing and design teams to ensure consistent branding across all campaigns, while optimizing emails for deliverability and performance. My work involves creating visually appealing, interactive, and mobile-friendly designs, implementing automation workflows, and continuously analyzing campaign results to improve engagement and overall effectiveness.

2021 - 2024

Frontend Developer **Ambassadors, Amsterdam**

Worked on Cube's dynamic templating system, setting up and creating the user interface of templates. And as part of creative automation team, we help brands create video and image marketing content at scale. I've been instrumental in creating immersive and visually captivating video experiences for clients. I immersed myself into React, JavaScript, HTML, CSS, Figma, GitLab – basically, my coding toolkit. Crafted some serious frontend wizardry to meet the specific needs of big shots like Booking.com, bol.com, Dyson, N26.

2020 - 2021

Frontend Web Developer **DutchDrops, Haarlem**

Worked as a frontend developer for an e-commerce company specializing in Shopware. Developed and maintained the platform using React, JavaScript, HTML, and CSS. Customized templates for a consistent, branded user experience and integrated plugins via Shopware APIs to enhance functionality. Conducted thorough testing of features like accounts and payment processes. Improved performance through responsive design and optimizations.

2020

Frontend Web Developer **Hellenique, Putten**

One-month internship here I could work with PHP, CSS, HTML, JavaScript, and WordPress

Education

Codaisseur, Amsterdam

Full-stack Academy Web Developer

During my journey to become a developer I learned JavaScript, React, Node.js, PostgreSQL, and more. It includes team and individual projects, code reviews, UX basics, and modern tools like GitHub and VS Code.
